SUBJECT INDEX

Aldosterone
  enhancement of angiogensin II-stimulated, production by the calcium chelator EGTA in bovine adrenal glomerulosa cells *in vitro*, 215
Androgen(s)
  receptor(s)
    5α-reduction of norethisterone enhances its binding affinity for, but diminishes its androgenic potency, 121
    specific binding of 5α-androst-16-en-3-one, in human testis, 137
    spermatogenesis in the vitamin A-deficient rat; possible interplay between retinoic acid receptor, and inhibin α-subunit, 67
  stimulation of lacrimal gland function in mouse models of Sjogren's syndrome, 237
Androst-16-ene
  use of gas chromatographic-mass spectrometric techniques in studies of, in human testis, 137
Anti-androgen(s)
  non-steroidal L-245,976 acts as a classical, *in vitro*, 131
Anti-estrogen(s)
  estrogenic activity is increased for an, by a natural mutation of the estrogen receptor, 261
Arachidonic acid
  functional dissociation between glucocorticoid-induced decrease in, release in AtT-20 corticotrophs, 51
Aromatase
  effect on, activity of 11β-hydroxysteroid dehydrogenase 1 activity and gene expression in human adipose stromal cells, 247
  mRNA of, expression and distribution in the adult rat brain, 325
  RU486 is a potent inhibitor of, induction in human breast adipose tissue stromal cells, 197
Aromatase genes
  gonadal sex differentiation in chicken embryos; expression of, 295
ATP
  intracellular, levels in *Spodoptera frugiperda* cells related to human glucocorticoid receptor and heat shock protein 90, 1

Breast adipose tissue stromal cells
  RU486 is a potent inhibitor of aromatase induction in human, 197
Breast cancer
  epidermal growth factor and transforming growth factor-α mRNA expression in human, biopsies, 221
  lack of relationship between the expression of HSP27 heat shock estrogen-associated protein and estrogen receptor or progesterone receptor status in male, 277
Breast cancer cells
  interaction between estradiol and growth factors in the regulation of specific gene expression in MCF-7 human, 269

Calmidazolium
  effect of, on steroidogenesis in Y1 cells, 189
Corticosteroid binding globulin
  glucocorticoids induce, biosynthesis by immature mouse liver and kidney, 163
  isotope effect in the binding of tritium and ^{14}C-labeled cortisol to, in serum, 255
  possible role of, on high-affinity binding of corticosterone to mammalian neuronal membranes, 229
Cytochrome P450
  biochemistry and pharmacokinetics of potent non-steroidal, -17α inhibitors, 347
  direct inhibitions of the activities of steroidogenic, monooxygenase systems by anticonvulsants, 77
  involvement of, in the 15α-hydroxylation of 13-ethyl-gon-4-ene-3,17-dione by *Penicillium raistrickii*, 339
  pregnenolone-7β-hydroxylating activity of human, -1A1, 147

5α-Dihydroprogesterone 3α-hydroxysteroid oxidoreductases
  regional distribution of cytosolic and particulate, in female rat brain, 311
1,25-Dihydroxyvitamin D_3
  differentiation induction of HL60 cells by, 87

24,25-Dihydroxyvitamin D_3
in vitro binding of vitamin D receptor occupied by, to vitamin D responseive element of human osteocalcin gene, 181

Epidermal growth factor
in human breast cancer, 221
Estradiol
interaction between, and growth factors in the regulation of specific gene expression in MCF-7 human breast cancer cells, 269
Estrogen(s)
immunocytochemical localization of c-*myc* and c-*jun* oncoproteins in hamster kidney and in kidney tumors induced by, 99
receptor(s)
analysis of ligand dependence and hormone response element synergy in transcription by, 285
characterization of mechanisms of interleukin-6 gene repression by, 11
estrogenic activity is increased for an antiestrogen by a natural mutation of the, 261
expression of, exon 5 splicing variant mRNA in gynecologic cancers, 25
gonadal sex differentiation in chicken embryos; expression of, and aromatase genes, 295

Fibroblast growth factor
developmental response by Leydig cells to acidic and basic, 171

Gene expression
characterization of mechanisms of interleukin-6, repression by estrogen receptor, 11
gonadal sex differentiation in chicken embryos and, of estrogen receptor and aromatase, 295
interaction between estradiol and growth factors in the regulation of specific, in MCF-7 human breast cancer cells, 269
of 11β-hydroxysteroid dehydrogenase 1 activity in human adipose stromal cells, 247
Glucocorticoids(s)
functional dissociation between, -induced decrease in arachidonic acid release and inhibition of adrenocorticotropic hormone secretion in AtT-20 corticotrophs, 51
induction of corticosteroid-binding globulin biosynthesis by immature mouse liver and kidney, 163
in mammalian neuronal membranes, 229
receptor(s)
DNA binding is induced by binding of the, DNA binding domain to its response element, 31
inhibition of mineralocorticoid activity by the β-isoform of the human, 43
in the spinal cord of the Wobbler mouse, 205
optimal ligand binding by the recombinant human, 1
Growth factor(s)
interaction between estradiol and, in the regulation of specific gene expression in MCF-7 human breast cancer cells, 269
Gynecologic cancers
expression of estrogen receptor exon 5 splicing variant (ER E5SV) mRNA in, 25

Hormone response element
analysis of ligand dependence and, synergy in transcription by estrogen receptor, 285
Hydrocortisone
-induced transcriptional down-regulation of β-galactoside α2,6-sialyltransferase in the small intestine of suckling rats, 59
11β-Hydroxysteroid dehydrogenase type I
activity and gene expression in human adipose stromal cells and effect on aromatase activity, 247
long term corticosteroid treatment affects, activity in rat brain and peripheral tissues, 319
17β-Hydroxysteroid dehydrogenase
sequence of mouse, type 3 cDNA and tissue distribution of the type 1 and type 3 isoform mRNAs, 19

Inhibin α-subunit
spermatogenesis in the vitamin A-deficient rat; possible interplay between retinoic acid receptor, androgen receptor and, 67
Interleukin-6
characterization of mechanisms of, gene repression by estrogen receptor, 11

Leydig cells
developmental response by, to acidic and basic fibroblast growth factor, 171

Mineralocorticoid(s)
inhibition of, activity by the β-isoform of the human glucocorticoid receptor, 143

Norethisterone
5α-reduction of, enhances its binding affinity for androgen receptors but diminishes its androgenic potency, 121

Oncogene(s)
immunocytochemical localization of c-*myc* and c-*jun*, in hamster kidney and estrogen-induced kidney tumors, 99
Osteocalcin gene
in vitro binding of vitamin D receptor occupied by 24R,25-dihydroxyvitamin D_3 to vitamin D responsive element of human, 181

Pregnenolone
-7β-hydroxylating activity of human cytochrome P450-1A1, 147
Pregnenolone-3,21-disulfate
is a placental precursor of deoxycorticosterone sulfate in plasma of pregnant women, 331
Progesterone
effects of, on the kinetics of pig testis microsomal testosterone-4-ene-5α-reductase activity, 353
receptor(s)
ovarian progestogen receptor in the spotted seatrout, *Cynoscion nebulosus*, demonstrates steroid specificity different from, in other vertebrates, 113
Pseudohypoaldosteronism
due to renal and multisystem resistance to mineralocorticoids respond differently to carbenoxolone, 105

Receptor(s)
androgen(s)
5α-reduction of norethisterone enhances its binding affinity for, but diminishes its androgenic potency, 121
spermatogenesis in the vitamin A-deficient rat; possible interplay between retinoic acid receptor, and inhibin α-subunit, 67
estrogen(s)
analysis of ligand dependence and hormone response element synergy in transcription by, 285
characterization of mechanisms of interleukin-6 gene repression by, 11
estrogenic activity is increased for an antiestrogen by a natural mutation of the, 261
expression of, exon 5 splicing variant mRNA in gynecologic cancers, 25
gonadal sex differentiation in chicken embryos; expression of, and aromatase genes, 295
glucocorticoids(s)
DNA binding is induced by binding of the, DNA binding domain to its response element, 31
inhibition of mineralocorticoid activity by the β-isoform of the human, 43
in mammalian neuronal membranes, 229
in the spinal cord of the Wobbler mouse, 205
optimal ligand binding by the recombinant human, 1
progesterone
ovarian progestogen receptor in the spotted seatrout, *Cynoscion nebulosus*, demonstrates steroid specificity different from, in other vertebrates, 113
vitamin D
in vitro binding of, occupied by 24R,25-dihydroxyvitamin D_3 to vitamin D responsive element of human osteocalcin gene, 181
5α-Reductase
inhibition with androgen receptor binding *in vitro*, 303
Retinoic acid
receptor(s)
spermatogenesis in the vitamin A-deficient rat; possible interplay between, androgen receptors and inhibin α-subunit, 67
differentiation induction of HL60 cells by, 87

mRNA(s)
sequence of mouse 17β-hydroxysteroid dehydrogenase type 3 cDNA and tissue distribution of the type 1 and type 3 isoform, 19
RU 38,486 (Mifepristone)
hydrocortisone-induced transcriptional down-regulation of β-galactoside α2,6-dialyltransferase in the small intestine of suckling rats is suppressed by, 59
is a potent inhibitor of aromatase induction in human breast adipose tissue stromal cells, 197

Sjogren's syndrome
androgen stimulation of lacrimal gland function in mouse models of, 237

Transforming growth factor-α
in human breast cancer, 221
Transforming growth factor-β2
differentiation induction of HL60 cells by, 87

Vitamin D
responsive element of human osteocalcin gene, 181

We would like to express our deep thanks to the following persons for their kind collaboration in reviewing papers for *The Journal of Steroid Biochemistry & Molecular Biology:*

Adessi G. L., Besançon, France; **Brownie A. C.,** Dundee, Scotland, U.K.; **Elias J.,** New York, U.S.A.; **Fiet J.,** Paris, France; **Isomaa V.,** Oulu, Finland; **Klocker H.,** Innsbruck, Austria; **Levenson A. S.,** Chicago, U.S.A.; **Louisot P.,** Oullins, France; **Martin M. B.,** Washington, U.S.A.; **Montgomery P. C.,** Detroit, U.S.A.; **Morris D. J.,** Providence, U.S.A.; **Motta M.,** Milan, Italy; **Nelson K. G.,** Bethesda, U.S.A.; **Njar V. C. O.,** Baltimore, U.S.A.; **Piva F.,** Milan, Italy; **Sjovall J.,** Stockholm, Sweden; **Smals A. G. H.,** Nijmegen, The Netherlands; **Span P. N.,** Nijmegen, The Netherlands; **Vignon F.,** Montpellier, France; **Walker B. R.,** Edinburgh, Scotland, U.K.; **Welch H.,** London, U.K.; **Wibbels T.,** Birmingham, U.S.A.; **Wiesner R. J.,** Heidelberg, Germany; **Zeldin D. C.,** North Carolina, U.S.A.
